## Canadian Western Red Cedar (Real Timber Venetian blind)

Canadian Cedar timber Venetian blinds are made of natural cedar wood. You can choose from two varied shades, light-medium timber or the medium- dark timber, both have 46mm slats. The darker the timber, the older the tree it is from so you may have more variety of shades in a medium- dark blind as the older trees aren't as available. The timber is lacquered to protect it against the sun. Swan blinds uses commercial grade head boxes and quality child safe string controls. All cedar blinds come with a 70mm pelmet included. Hold down clips are optional and generally used if the blinds are attached to a door.

## Real Hardwood Timber Paris Blanc (Real Timber Venetian blind)

Paris Blanc is a 100% natural wood blind system, designed to appeal to retail customers who are seeking a combination of classical white colors, stylish appearance and the lighter weight that can only be provided by real wood systems. The range is available in both 50mm and 63mm slat widths. The product also features a stylish new 82mm arch fascia and trapezoidal base rails in 50mm and 63mm.

## Why choose real timber?

We only use timber for our Perth made blinds that is sustainably sourced. Timber is much lighter than PVC or any plastics used to manufacture venetian blinds making it a good option for large blinds.

Our Timber blinds all come with commercial grade head boxes, child safe controls and color coordinated strings. All of our timber venetians come with pelmets too.
